Patient Protection and Affordable Care Act (PPACA); Emerging Infections Program (EIP); Enhancing Epidemiology and Laboratory Capacity (U01)		The purpose of this EIP-ACA FOA is to support state and local health departments' surveillance infrastructure through enhancement of the epidemiology and laboratory capacity of the existing EIP network. Over the past 15 years, the EIP network has proved to be a national resource for conducting active, population-based surveillance and special studies for invasive bacterial diseases, foodborne pathogens, healthcare associated infections (HAIs), influenza, and many other infectious diseases. The network has been instrumental in measuring the impact of the 7-valent pneumococcal conjugate vaccine, informing and evaluating treatment guidelines for Group B Streptococcus, estimating the burden of foodborne illness, documenting the emergence of community-associated methicillin-resistant Staphylococcus aureus, and monitoring the safety of the 2009 H1N1 vaccine as part of the influenza vaccine safety network			Mainly State Governments.
